Customer Success

Eliya Shlomo

AI Integration & Product Builder | Backend Dev • LLM/OCR Pipelines
• Cloud Infrastructure | Bridging AI Innovation with Real Business
Impact | B.Sc. CS | Open to AI Engineer & fullstack Roles
Petah Tikva, Center District, Israel

Summary

My background is unusual — and that's the point.

I started in sales (Bezeq, Partner), ranked #1 consistently, and learned the one thing most engineers never do: how to deeply understand what people actually need.

Then I went deep into technology:

- B.Sc. Computer Science, Ariel University
- Built LLM + OCR pipelines in production (Moremenues)
- Designed RAG systems, LangChain agents, GenAI automation tools
- Deployed cloud infrastructure on AWS with Terraform, Docker, K8s

What drives me is one question:

"Where are humans doing repetitive, cognitive work that AI can do better — and how do we build that product?"

I'm looking for roles at the intersection of AI and product:

AI Engineer / AI Integration Developer

Product Manager — AI-powered products

If you're building something that uses AI to replace or augment human workflows — let's talk.

eliyashlomo7@gmail.com

Experience

ELPC - IT & SECURITY

Account Manager

January 2026 - Present (6 months)

Moremenues

Back End Developer

December 2023 - October 2024 (11 months)

- o Developed and maintained backend microservice features for OCR and LLM operations within a modular microservices environment.
- o Improved integration with internal services and third-party APIs, streamlining data flow and backend communication.
- o Enhanced backend stability and modularity by refactoring code and ensuring a clear separation of responsibilities.
- o Assisted in containerizing backend services with Docker, supporting consistent development and deployment processes.
- o Contributed to deploying and orchestrating backend services with Kubernetes, enabling efficient scaling and management.

Bezeq International

Salesperson

January 2021 - January 2022 (1 year 1 month)

- o Ranked among the **top-performing sales representatives**, consistently **surpassing sales goals and team averages**.
- o Specialized in **cold approach and outbound sales**, initiating meaningful conversations that led to high closing ratios.
- o Led **end-to-end sales processes** — from prospecting and engagement to deal closing and customer retention.
- o Developed a reputation for **building trust rapidly** and translating customer needs into clear, value-driven offers.
- o Collaborated with customer service and support teams to enhance the client experience and drive repeat sales.
- o Earned **internal recognition** for excellence in both performance and customer satisfaction.

Partner

Salesperson

March 2019 - August 2020 (1 year 6 months)

Tel Aviv District, Israel

- o Consistently ranked among the **top 3 sales representatives** on the team, with several months achieving **#1 performance**.
- o Maintained **one of the highest sales conversion rates** within the department.
- o Excelled in **cold approach sales**, initiating contact with new clients and achieving exceptional success rates.
- o Demonstrated strong **persuasive communication, empathy, and relationship-building** skills, earning trust quickly with diverse customers.
- o Consistently **exceeded monthly sales targets** and KPIs in a competitive environment.
- o Delivered **consultative sales solutions**, tailoring offers to customer needs and increasing satisfaction and retention rates.
- o Recognized by management for **initiative, professionalism, and outstanding sales performance**.

Education

Ariel University

Bachelor of Science, Computational Science · (2021 - 2024)

Udemy Alumni

Ultimate DevOps Project Implementation

Udemy Alumni

certificate, DevOps MasterClass: Terraform Kubernetes Ansible Docker
